EDUCATION

B.S. Computer Science, Mathematics | University of Wisconsin-Madison May 2025
GPA: 3.7/4.0 | Study Abroad: University of Copenhagen (Software Engineering)

SKILLS

Languages & Frameworks: Python, Java, C#, JavaScript/TypeScript, SQL, React, Node.js, .NET, MongoDB, PostgreSQL
Infrastructure: AWS (Solutions Architect – Associate Certification), CI/CD (GitHub Actions), Terraform, Docker
Core Areas: System design, distributed systems, backend development, internal platforms, APIs, automation

EXPERIENCE

Spectrum | Madison, WI Jun 2025 – Present
Associate Software Engineer

- Delivered a calendar scheduling overhaul used by hundreds of designers and contractors, eliminating manual day-by-day entry by building a range-based bulk scheduling system end-to-end
- Implemented event-driven approval logic across an Angular frontend and MongoDB backend, enabling automated workflows and reducing manual intervention, by designing and integrating custom business rules
- Improved reliability of a Java microservices provisioning platform (Camunda) supporting internet, voice, and TV services, by developing Groovy unit tests and assisting migration from legacy APIs to a modern architecture

Skyward Inc. | Stevens Point, WI Jun 2022 – Feb 2025
Associate DevOps Engineer

- Owned and scaled an internal developer platform serving 300+ engineers, improving environment provisioning efficiency, by expanding C#/.NET tooling for environment lookup, navigation, and VM management
- Reduced environment provisioning time from 1 hour to 5 minutes (92% improvement), by automating end-to-end setup with SQL-backed dynamic forms and IT ticket integration
- Eliminated manual environment setup workflows by building a self-service UI for provisioning virtual test environments integrated with Hyper-V systems
- Accelerated build and release cycles across multiple services by implementing GitHub Actions CI/CD pipelines

PROJECTS

- Built a Python app using QuickBooks API to show overdue invoices and exposure metrics via web dashboard
- Developed a React-based workflow visualization tool based on client requirements, improving system transparency, and documented architecture using UML diagrams

LEADERSHIP & INVOLVEMENT EXPERIENCE

Humorology | University of Wisconsin – Madison
Lead Director April 2023 – Dec 2023

- Led a cast of 100+ students, representing Delta Chi in the production of UW-Madison's annual Greek philanthropic theater performances, contributing to over $400,000 raised for Wisconsin charities

Wisconsin State Capitol | Madison, WI
Legislative Intern Sept 2024 – May 2025

- Conducted policy research and drafted briefing materials on key issues including agriculture, health, and AI
- Supported constituents by responding to inquiries and helping resolve issues related to government programs
